

Greetings and welcome to Iashh.

The institute of the Applied Science for Hypnosis & Hypnotherapy.

First established in 1987 for the advancement of self help and motivational programs.

By collating the teaching a number of hypnosis schools and philosophies, Iashh was formed.

Keeping ahead of latest trends throughout the years, we believe we have the most comprehensive and thorough courses available. Whether a beginner or an established practitioner who would want to refresh their knowledge.

Our in-house and mail order courses, have been widely acknowledge as the front runner within the last 30 years.,

And with the advent of the internet we extended our courses on-line, thus allowing the student the convenience of learning at their own speed of pace, and from the comfort of their own home.

By spreading the course over time, so the student can learn and become proficient in the science of HYPNOSIS & HYPNOTHERAPY and other allied professions of interest.

Within the courses we have a number of tutors who offer, voice recordings, writings and video presentations.

OUR head TUTOR is Clive Branson Cph,Hyp, who first established Iashh in 1987
